education

Colorado College – *B.A. in Integrated Design, minor in Computer Science*
– Graduated May 2019, 3.94 GPA, magna cum laude, Phi Beta Kappa Honor Society
– Co-chair of Integrated Design Group, CC Cycling Team kit officer and racer
Aquincum Institute of Technology – *Budapest, Hungary – Summer 2018*
– mobile application development (Android)

experience

Granicus, Inc. – *Web Designer* Sep 2019–Present
Deploy, maintain, and debug custom reports and webpages for government organizations using HTML/CSS, JavaScript, Liquid, Smarty, and various templating systems. Work within the GovMeetings product family to help make governments more accessible to citizens.

Prudential Financial – *UI/UX Intern* Jun 2019–Sep 2019
Built custom Drupal 8 CMS theme and webpages to update internal company website using HTML/CSS/JavaScript/Twig, and designed UIs for Salesforce applications using Sketch and inVision. Created user stories, user flow diagrams, lo-fi wireframes, and conducted interviews as part of the design process for each project.

Colorado College – *3D Shop Monitor* Aug 2018–May 2019
Maintained a safe and clean woodworking and metalworking shop, and provided guidance to students on their technical design challenges.

Leviathan Magazine – *Web Editor* Aug 2018–May 2019
Developed and maintained Leviathan Magazine's website and archived previous magazine editions, and designed posters to promote literary arts events at Colorado College.

Buffalo Lodge Bicycle Resort – *Marketing Intern/Front Desk* July 2018–Aug 2018
Produced social media assets for Instagram and Facebook, created marketing collateral materials and supported front desk duties for a 50 room bicycle-themed motel in Colorado Springs.

SelectQuote Insurance Services – *Freelance Graphic Designer* Aug 2017–Feb 2018
Created #MotivationMonday and holiday images for five social media platforms, and designed cycling kits, stickers, postcards, banners for the 2017 Jensie Gran Fondo.

Girls Who Code – *Summer Immersion Program Teaching Assistant* Jun 2017–Aug 2017
Successfully introduced 20 high school students to the excitement of coding through creative assignments in Python, Arduino C, HTML/CSS and JavaScript to spark interest in pursuing STEM degrees or careers.
